BEST SELLER!

Hot Dog Stand: The Works

Grades 5 and up

XP Compliant

Challenge students to apply math skills!

Students improve math, problem-solving, and communication skills in this 'real-life' business simulation where they manage a busy concession stand in a big-city stadium. Students interpret information, keep records, determine prices, and plan marketing strategies. They develop these important data analysis and operations skills as they keep their stands profitable.

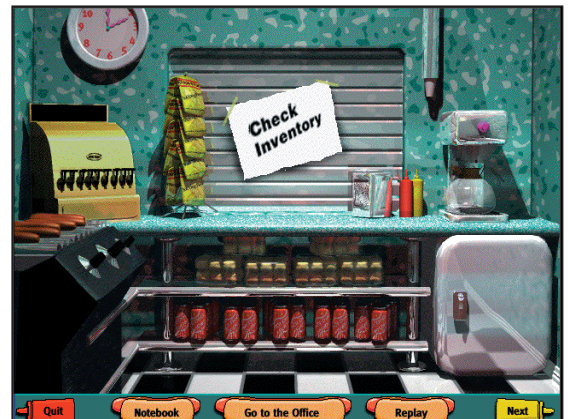

Students have access to an assortment of tools to accomplish their goals. An on-screen calculator and calendar, a bulletin board of stadium events, and a daily weather report are among the resources available. Students make informed decisions and develop the resources and flexibility to deal with unexpected events.

Curriculum Skills

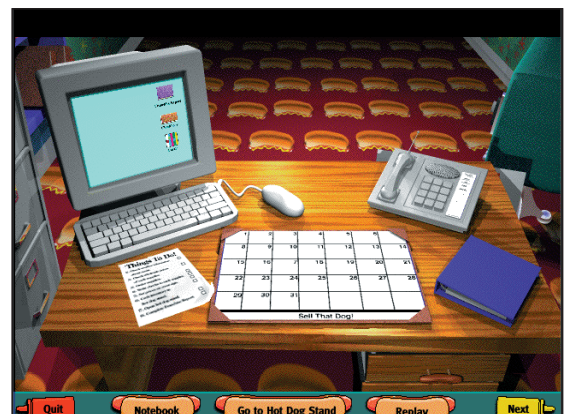

- Addition, subtraction, multiplication, and division
- Recognizing patterns
- Collecting and analyzing data
- Reading and interpreting graphs
- Decision-making processes

Special Features

- Real-life business simulation
- On-screen calculator and calendar, a bulletin board of stadium events, and a daily weather report

Open the Hot Dog Stand and see how your decisions effect sales.

Analyze data to improve your business with powerful office tools.
