

The **Key Skills Learning System**® is a line of Language Arts and Math products known for appealing standards-based core curriculum exercises, differentiated instruction, and an easy-to-use management process.

The system is a complete and sequential learning tool, containing over 150 animated activities, a redesigned student interface, and a newly enhanced management tool which automatically upgrades any previously installed **Key Skills** modules.

The **Key Skills Learning System**® facilitates at-risk students to be identified and gives data needed for Title 1 funding. Educational environments are able to assign activities, capture student performances, create diagnostic reports, demonstrate accountability, and meet *No Child Left Behind* requirements.

All **Key Skills Reading** programs correlate to **Reading First, NTCE, IRA, and NCTM standards.**

The Key Skills™ Management Tool

The backbone of the **Key Skills System** is the *Management Tool* – a flexible yet powerful means to globally manage the usage, assigning, and reporting functions for all **Key Skills** student activities.

The full-featured *Management Tool* automatically installs, with every **Key Skills** CD-ROM, on classroom computers or a Network server. All student data files, as well as every activity, remain organized under one password-protected management interface for each teacher.

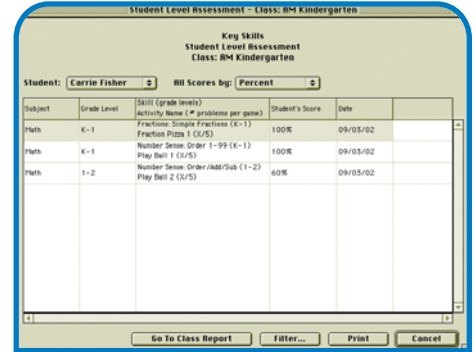

The *Management Tool* supports differentiated instruction through its ability to track individual student progress allowing teachers and administrators the assignment, assessment and reporting functionality necessary to meet adequate yearly progress goals.

The *Management Tool* needs to be activated and populated with students data to run **Key Skills** activities. Imported data is easily accommodated. Many teachers and administrators successfully use the *Management Tool* to:

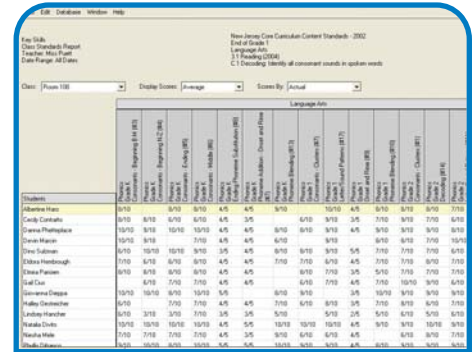

- Manage class and student lists
- View and filter student performance data
- Generate and print a variety of student reports
- Assign each student to targeted activities
- Show school progress toward learning goals
- Aligns all activities to education standards, benchmarks, equivalences, and minimums in all states

OS X Native/XP Compatible

Aligns all activities to education standards in all states

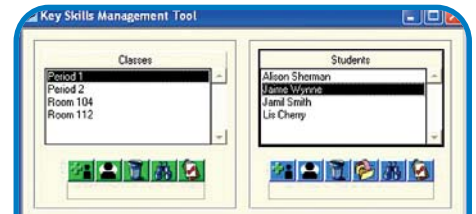

Detailed individual reports help target instruction.

Student performance data tracks students' progress towards goals.

Key Skills™: Spelling and Phonics

Create student groups with ease.
