

Key Features of the

The Key Skills Learning System: Language Arts is a comprehensive core curriculum solution for K-3 Language Arts.

- Key Skills: Language Arts **supports differentiated instruction**, where you can create different learning pathways for each student tied to their unique skill level.
- All Key Skills Learning System **activities are aligned to every state's standards**, benchmarks, and objectives.
- Key Skills: Language Arts includes **standards-based assessments**.
- There are 110 Language Arts re-playable student activities, each designed to build a specific standards-based skill.
- Key Skills: Language Arts is delivered on a school network or on 6 CD-ROMs.
- All are designed for easy formative assessment and targeted skill-building.
- Key Skills: Language Arts was developed by the same team behind Type to Learn.
- Key Skills: Language Arts aligns with Reading First, acknowledged by educators as the core of K-3 reading.
- Assesses students against key elements in Reading First and allows you to assign a skill-building activity based on that assessment.
- The Key Skills Learning system has already won several industry awards and outstanding reviews.
- Contains the easy-to-implement and easy-to-use Teacher Management Tool - a flexible yet powerful means to globally manage the usage, assigning, assessment and reporting of all Key Skills student activities.
- The Teacher Management Tool allows teachers and administrators the assignment, assessment and reporting functionality necessary to meet **adequate yearly progress goals**.
- The full-featured Teacher Management Tool automatically installs with every Key Skills CD-Rom installed on classroom computers or a Network server.

Key Skills Learning System Features

Standards-Based

The Teacher Management Tool correlates all Key Skills instructional reinforcement activities to all states' standards and many states' equivalency and minimum goals as well.

Assessment and Reporting

The Teacher Management Tool supports differentiated instruction through its ability to track individual student progress at any time, allowing teachers and administrators the assignment, assessment and reporting functionality necessary to meet adequate yearly progress goals that correlate to THEIR state standards.

Depth of Content

The Key Skills Learning System features 160 Language Arts and Mathematics reinforcement activities (each of which can be played multiple times without any repetition) which is very important in curriculum reinforcement software.

Produced by Sunburst Technology Corporation, one of the best known and respected developers and publishers of educational software programs for the K-12 market.
