Math Essentials: Addition and Subtraction

Grades 2-5

Build Operational Skills

The **Math Essentials** programs build students' operational skills in a colorful practice environment where they can easily construct and readily solve problems of increasing difficulty. With the help of a friendly clan of cave dwellers who present everything from simple operations to solving multi-digit problems with decimals, students gain the confidence to handle computational and operational mathematics.

Learning Opportunities

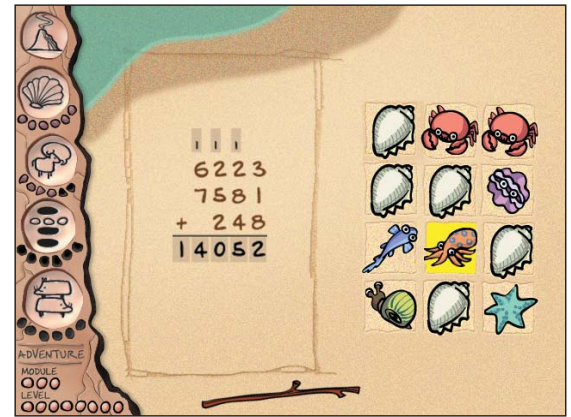

Students practice the fundamentals of addition and subtraction in an environment that supports a step-by-step approach to problem solving.

- Addition and subtraction
- Regrouping activities
- Multi-digit operations
- Problems with decimals

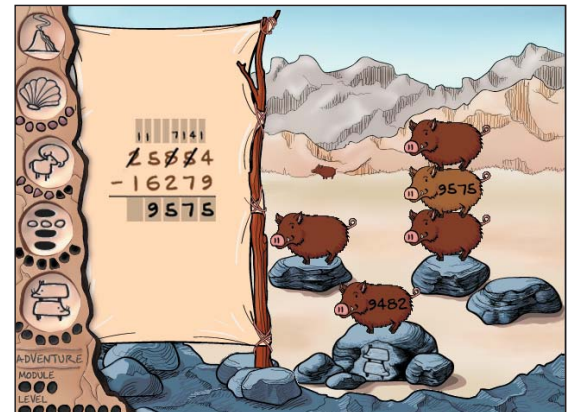

Special Features

- Three activities with six levels of play
- On-screen demonstrations
- Complete reporting feature
- Password-protected teacher control option

In this game, students complete a dynamic addition problem and receive an award.

Students build place value skills organizing answers to a series of problems.
