

# SUNBURST

**Meets  
NCTM  
Standards for  
Numbers**

**NETWORK  
HYBRID CD**

## Minimum System Requirements

Macintosh: OS 8.0 or higher, 640x480 screen resolution, 100 MHz Power PC or better, 256 colors  
Windows: Win 95/98/ME/NT/2000/XP, 16 MB RAM, 90 MHz processor or better, 640x480 screen resolution, 256 colors

**NEW!**

# Numbers Recovered

**Grades K-3**

## Introduces students to new number concepts

With all the fun and intrigue of *Numbers Undercover*, this program provides new skills for young learners to master! Students strengthen their number sense in these areas and they engage in four skills-building activities. As they complete each activity they are awarded clues to unlock a door leading to missing numbers to solve the case.

## Learning Opportunities

**Number Representations:** Recognize, compare, and sort equivalent number representations.

**Number Comparisons:** Identify inequalities and order relationships using “greater than,” “less than,” and “equal to” symbols.

**Place Value:** Understand grouping and place value through standard and expanded notation.

**Graphing:** Organize, represent and interpret data with pictographs and bar graphs, and solve word problems based on data.

## Special Features

- A *Help Screen* with audio support is available for each activity
- Activities can be modified to meet the individual needs of students
- An onscreen *Counter Tool* similar to the manipulative used in classrooms is available for computational support
- Three levels of difficulty

In *Puzzling Place Values*, students manipulate ones, tens, and hundreds places.

Students clear the path for Max's car by sorting tallies, words, and simple arithmetic problems.
